#FIPCongress2026

FIP world congress 2026, themed **“One Health, One Pharmacy – Bridging science, practice and education”**

aims to explore how pharmacists can drive progress towards better health outcomes, equitable access to essential medicines and resilient health systems worldwide. The congress will also explore how pharmacists, pharmaceutical scientists and educators can contribute to strengthening primary health care, improving the responsible use of medicines, supporting more efficient and sustainable supply systems, and ensuring that the health workforce is prepared to meet the evolving health needs of communities around the world.

The congress is structured around three subthemes, each addressing key facets of this overarching theme.

Host

The International Pharmaceutical Federation (FIP)

Congress partner

Canadian Pharmacists Association (CPhA)

- The subtheme **“Integrated health”** focuses on how pharmacists apply the One Health concept in practice—addressing interconnected challenges across human, environmental and system levels.
- **“Innovating with purpose”** emphasises how purposeful advances—whether through new care models, scientific discoveries, educational methods or technology—can shape the future of pharmacy.
- **“Collaborating for equity”** explores how pharmacists and pharmacy stakeholders can drive progress towards health equity through collaboration and inclusive practices.

Join us in Montreal to be part of this discussion!
